

INFLATABLE BAGS

Perfect for securing and stabilising pallets in your lorry and/or container during transportation. Our inflatable bags are a **fast, efficient and economical** way of securing goods in containers and other compartments.

Inflatable paper bag, which is inflated using a valve and used to secure packages during transport, preventing the goods from moving about and ensuring that they arrive at their destination in perfect condition.

Advantages

Reusable

Fast, easy set-up.

Reduce the costs of returns, breakages and claims compensation

Can be used in maritime, land, air and rail **transports**

Reduced unloading time as pallets remain correctly positioned inside the transport vehicle

Reduced need for other materials such as film or fastening tapes

Good presence in the shipment of goods

Different dimensions available according to the client's needs
