

PRE-CUT CORNER PROTECTOR

Pre-cut corner protectors are used to **protect the edges of goods** and can be used for corners/straight edges, both vertically and horizontally. One or more (as required) pre-cut lines create a single edgeboard model that **can be used for different dimensions** (heights/widths).

Advantages

A single edgeboard for different heights

Protects the corners/edges of the product and/or pallet

Stabilises the product and/or pallet during storage and transport

Spreads out the pressure of the strap and film

Customization options

- Printing
- Adhesives
- Lamination
- Uneven wings

Weights and dimensions

- Wings: from 25mm to 100mm
- Thickness: from 2mm to 10mm
- Length: from 50 to 6000mm
