

PRESSED FIBRE PALLETS

Our pressed fibre pallet is manufactured with a **moulding technique** that enables the creation of different products with different shapes.

It is composed of **92% virgin wood** from European conifers and 8% binders of various qualities.

Advantages

Saves space and costs in transport and storage

Piles of 60 pallets **can be stacked together** at a height of 2.10 metres

Long useful life

Reusable

Mechanical strength

Dimensional precision

100% recyclable

No metal elements such as screws or staples

Lightweight

Heat treatment

Flame retardant treatment

Certified: NIMPI5 and PEFC

Weights and dimensions

→ 600x400mm, 800x600mm, 800x1200, 1000x1200mm

→ Option to manufacture a customized moulded piece

Applicable sectors

Food,
Agriculture

Graphic arts

Automobiles,
Aeronautics

Industrial components,
Medical equipment

Construction

Domestic appliances,
Air Conditioning

Electronics

Paper, Flexible plastics
and Textile industries

Glass industries

Extractive and
Chemical industries

Pharmaceutical,
Cosmetics and
Fragrance industries

Metallurgical
and Profiles

Furniture

Transport,
Logistics
