

PROTECTIVE HONEYCOMB EDGEBOARDS

A protective profile made from honeycomb cardboard protects the edges/corners of your product. These honeycomb cardboard edgeboards are made up of a hexagonal structure that is similar to the wall of a beehive, and combine a **lightweight feel** with **high compressive resistance and shock absorption**.

Advantages

Honeycomb structure means **high capacity for shock absorption**

Tailor-made

Dimensions in stock: **immediate availability**

Customization options

- Printing
- Adhesives
- Lamination
- Uneven wings
- Option of applying a fire-retardant coating
